

GAGANA SATHYA NARAYANA PRASAD

MACHINE LEARNING / AI ENGINEER

Wesley Chapel, FL | +1 (662) 694-5103 | spoorthigaganas@gmail.com

www.linkedin.com/in/gaganasathya

SUMMARY

Machine learning and Python developer with computer vision research experience and production healthcare software delivery. Built ResNet-50 and YOLOv8 models for dairy cow behavior analysis and co-authored published research. Developed claims data parsers, workflow automation, and a Flask application used by approximately 225 employees.

TECHNICAL SKILLS

ML and data: Python, scikit-learn, CNNs, ResNet-50, YOLOv8, autoencoders, Random Forest, image annotation, model evaluation

Software and tools: SQL, PostgreSQL, Flask, HTML, CSS, JavaScript, SAP ABAP, Power Automate Desktop, ServiceNow

EXPERIENCE

ATS Healthcare | Wesley Chapel, FL

Software System Analyst

Nov 2025 - Present

- Developed production Python parsers for X12 835 remittance and 837 claim files, establishing ATS's first structured PostgreSQL repository for this previously uncaptured data and enabling internal analysis.
- Developed and deployed a Flask/PostgreSQL Rulebook application within ATM to centralize practice-specific billing information and workflows for approximately 225 U.S. and offshore employees.
- Built production Power Automate Desktop automation to process multiple ERAs autonomously in Tebra/Kareo, including login, payment posting, denial handling, exception handling, and logging.

Animal Dairy Science, Mississippi State University | Starkville, MS

Machine Learning Engineer

Feb 2025 - May 2025

- Developed ResNet-50 and YOLOv8 models to analyze standing, lying, and eating behaviors in dairy cows, supporting computer vision research into heat-stress monitoring.
- Manually prepared and labeled images extracted from cattle video footage for behavior classification.
- Contributed to a published study reporting 89.2% accuracy, 89.5% precision, and 87.4% recall on independent test videos for behavior prediction and breed differentiation.

Social Science Research Center | Starkville, MS

Web Developer

Nov 2023 - Jan 2024

- Developed websites using HTML, CSS, and JavaScript to support surveys and share research information.

Accenture | Bengaluru, India

Associate Software Developer

Sep 2021 - Jul 2023

- Developed and maintained SAP ABAP code for government finance platforms, including reports, financial transaction processing, data updates, and defect resolution; tracked assigned tasks in ServiceNow.

EDUCATION

Mississippi State University | Master of Engineering, Computer Science

Aug 2023 - May 2025 | GPA: 3.72/4.00

RESEARCH AND PUBLICATIONS

Dairy cow computer vision research | Second author | Published abstract, 2025

Joshi, H., Gagana Sathya Narayana Prasad, et al. "Vision-based ResNet-50-CNN and YOLOv8 models for predicting behavioral patterns under heat stress in lactating Holstein and Jersey Cows." Journal of Animal Science, 103(Supplement 3), 4-5. doi:10.1093/jas/skaf300.006.

Applications of PU Learning for DDoS Detection | Master's thesis; published

Gagana S., Charan Gudla. Applied PU Bagging, autoencoders, and Random Forest to partially labeled CICDDoS2019 network traffic, addressing class imbalance and limited labeled data.
